EXTERNAL: CSV Changes for Vulnerability Analysis Reports

On December 5, 2023, CSV generation for the Vulnerability Analysis reports will be decoupled from data processing resulting in the following changes to Full Data CSV report options:

- Full Data CSV reports will no longer include columns/fields that are duplicates, have been deprecated, and/or are used exclusively for internal or presentation purposes.
- The order of columns/fields in the CSV reports may be modified as a result of adding and/or removing fields.
- CSV filenames and column/field names will be updated to be consistent across reports.

Monthly Vulnerability Summary Report

The table below captures the specific changes to the Full Data CSV for the Monthly Vulnerability Summary report.
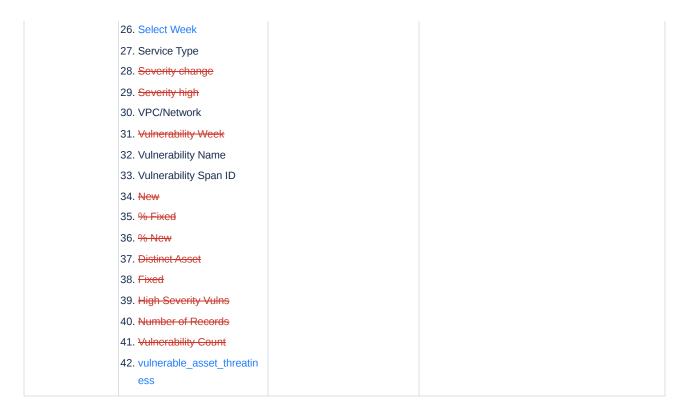

Report Option	Current Columns and Order	New Columns and Order (December 5)	Summary of Changes
Full Data (CSV)	1. Category 2. Customer Account 3. CVSS Score 4. Deployment Name 5. ~~Host/All~~ 6. ~~Selected Month?T|F~~ 7. Severity 8. Age 9. ~~Age (days)~~ 10. Asset Key 11. Asset Type 12. ~~Customer Filter~~ 13. CVE 14. Exploitability 15. Host Name 16. IP Address 17. Is External 18. Is Fixed 19. Is New 20. ~~Is this month~~ 21. Managed Account Id (V Parent Child Accounts) 22. ~~Managed Account Name~~ 23. ~~Managed By Account ID~~ 24. ~~Managed By Account Name~~ 25. Operating System 26. Select Month 27. Service Type 28. ~~Severity change~~ 29. ~~Severity high~~ 30. VPC/Network 31. ~~Vulnerability Month~~	1. Month 2. Category 3. Customer Account 4. CVSS Score 5. Deployment Name 6. Severity 7. Age 8. Asset Key 9. Asset Type 10. CVE 11. Exploitability 12. Host Name 13. IP Address 14. Is External 15. Is Fixed 16. Is New 17. Account ID 18. Operating System 19. Service Type 20. VPC/Network 21. Vulnerability Name 22. Vulnerability Span ID 23. Vulnerable Asset Threatiness	☑ Remove 19 columns (highlighted in Red) ☑ Rename 3 columns (highlighted in Blue) - Month of Select Month (change to Month) - Managed Account Id (change to Account ID) - vulnerable_asset_threatiness (change to Vulnerable Asset Threatiness) ☑ Rename CSV file to "Monthly_Vulnerability_Summary_Full_Data.csv"
